

STAGES OF FORMATION AND MODERN STATE «MEMORABLE
LANDINGS» ON THE TERRITORY OF THE FIRST BUILDING OF NUBIP OF
UKRAINE IN KIEV

A. I. Kushnir, O. A. Sukhanova

«Memorable landing» at the National University of Life and Environmental Sciences of Ukraine is a historical and cultural fit, card and decoration of the institution associated with prominent figures and scholars. Current issues is the preservation of cultural and natural heritage and the development of measures on organization of existing and new places «memorable landing» on campus, their protection, conservation and sustainable use.

The structure of «memorable landings» in the territory of the first building of basic institutions NUBiP Ukraine included a number of tree species, different ages and species composition.

Ornamental plantings around the first building NUBiP Ukraine on the street. General Rodimtsev, 19 m. Kiev began to lay upon completion of its construction in 1930.

The stages of shaping ornamental plantings in the territory of the first building NUBiP Ukraine we have identified the following stages: Stage 1 – 1930-1941 biennium – laying plan structure territory and conduct operations; Stage 2 – 1941-1950 biennium - the destruction of educational buildings, damage to ornamental plantings, gradual restoration of the building; Stage 3 – 1950-1990 biennium – restoration of decorative plantings after reconstruction academic building; Stage 4 – from 1991 – present – formation of modern planning structure territory partial reconstruction of plants and laying «memorable landings».

To preserve the «memorable landings» are necessary measures for the organization of their habitat, protection, conservation status by granting, renewal and management.

Particular attention in the work of reconstruction stands next to the first building should be given to the growing memorial tree – oak prof. Alekseeva, oak acad. Pogrebnyak and oak prof. Nikitin, and large-size trees that create a frame stands on the site.

An important step in the formation of decorative plantings research on the subject, starting with the 90-ies. XX century, and now is laying «memorable landings» in honor of famous scientists and foresters anniversaries.

Over the past 20 years in the first building NUBiP Ukraine was established a number of «memorable landings».

«Professor Elm locally» – druid tree, mountain elm (*Ulmus glabra* Hubs.), Has a good decorative condition and needs of the territory establish an information board about a famous scientist.

«Oak landscapers» – the red oak (*Quercus rubra* L.), today needs of the territory and establishing an information board about the event, which was dedicated landing.

«Group memorable oaks» – oak (*Quercus robur* L.) (3 copies), represents the three components of modern forestry, professional education, industry science and forest production. Commemorative tree takes a group of the territory and the establishment of an information board about the incident, after which and pawned.

«Decorative tsertsys» – european tsertsys (*Cercis siliquastrum* L.), needs of the territory and the establishment of information plaques about this memorable event.

«Bodrov Professor Oak» and «Associate Professor Oak Gerasimenko» – members of the species red oak (*Quercus rubra* L.), with good decorative condition. In the spring of 2014 carried out works on organization of the territory near the memorial trees, but still need to install information signs about these famous scientists.

«Rowan Professor Gordienko» – tree-druid, mountain ash (*Sorbus aucuparia* L.), needs of the territory and establishing an information board about a famous scientist.

Age plants and «memorable landing» around the first building NUBiP Ukraine needed to develop individual conceptual approaches to preserve and care for them – the future of the territory around the habitat, cleansing and balancing crowns, information stands installation and use for research, inspection, rehabilitation old trees modern equipment (rezystohraf, scanner) and methods arboculture.

To ensure the protection of old trees «Alexeyev Professor Oak» and «Oak academic Pogrebnyak» necessary for the status botanical natural monuments of local importance.
